

Our Symphony of Curved Steel

at the Kimmel Center for the Performing Arts

- 🎵 300 tons of 5-in. square steel tubing roll-curved 45° off axis by Chicago Metal Rolled Products to frame a barrel-vault skylight 150-ft. high and 327-ft. long.
- 🎵 Radius tolerances within 1/16 in.—“unheard of in structural steel or even architectural steel” according to Rafael Viñoly Architects.
- 🎵 High quality, on time, within budget: music to a fabricator’s ears.

Call us when you need quality roll-curving of structural steel and plate
