

CHICAGO METAL ROLLED PRODUCTS

Saved \$24,000 of Weld Splices with One-piece "S" Curves.

Chicago Metal created **16 reverse curves** of **W33x169#** beams, cold bent on the x-x axis, each without a **\$1,500 weld splice**. A total of 310 tons of curved beams form the wavy roof of the Ratner Athletic Center at the University of Chicago, winner of the AISC Engineering Award of Excellence.
