

# FAST, RELIABLE, ACCURATE.

Like your data plan...  
but 750 tons heavier

The Sprint Center in Kansas City  
is home to 750 tons of 16" OD pipe  
curved to radii from 152' to 350'.

Forming both the horizontal and vertical members of the curtain wall of the Sprint Center,  
the curved steel frame is *held to tolerances tighter than those of the AISC Code of Standard Practice.*

### Full-service rolling facility located in Kansas City

In Kansas City, the company can now curve up to 20" OD pipe (see photo below) and 40" beams providing its customers in the south, west and central United States with reduced freight costs, quicker delivery and increased capacity.
