

## MGM National Harbor Casino

Baltimore, MD

132 tons of steel rolled by Chicago Metal Rolled Products throughout the entire structure. The focal point of the casino includes an elliptical & domed skylight that required a box welded beam constructed from segments of elliptically rolled  $\frac{3}{4}$ " Grade 50 plate. The skylight ribs constructed of parabolic arching Hollow Structural Sections and Wide Flanged Beams take on a 3rd dimension, adding even more space to the interior entrance of the casino and doming the skylight.
