

Our Symphony of Curved Steel

at the Kimmel
Center for the
Performing Arts

- 300 tons of 5" square steel tubing roll-curved 45° off axis by Chicago Metal Rolled Products to frame a barrel-vault skylight 150' high and 327' long.
- Radius tolerances within 1/16"—*"unheard of in structural steel or even architectural steel"* according to Rafael Viñoly Architects.
- High quality, on time, within budget:
These are music to a fabricator's ears.

Call us at 800-653-8846

For savings on quality roll-curving
of structural steel, sheet and plate
delivered to meet *your* schedule.
