

Stimulate Your Infrastructure With Steel Curved by Chicago Metal Rolled Products

◀ 17-92 Pedestrian Bridge (Longwood, FL)

It doesn't matter how complex the curve is. For this project Chicago Metal Rolled Products curved 66 tons of 14" square tubing up to 70' long with both sweep and camber.

Highland Bridge (Denver, CO) ▶

This award-winning bridge is both dramatic and economical. Chicago Metal Rolled Products' Kansas City facility was able to curve 153 tons of 18" outside diameter tubing up to 100' long, which reduced splicing costs.

◀ Tempe Town Bridge (Tempe, AZ)

Winner of multiple prestigious awards, each of the four 228' long arching sections consists of 16" diameter HSS pipe curved up to 46' in good arc....a pedestrian bridge providing both function and aesthetics.

Our nation needs infrastructure improvements. Let Chicago Metal Rolled Products help you build bridges, tanks, tunnel supports, cofferdams, culverts, man ways, guard rails, viaducts, reinforcing columns and other structures.

Call us at 800-653-8846

When you need high-quality, high-value curving of steel.
